

Microsoft CRM Interview Questions and Answers

[How to Debug the javascript that we write for some validation on entity pages ?](#)

Answer :: Following are the steps that are needed to be followed:

1. Enable the Debugging in the Internet Explorer - Goto Tools && Internet Options (wizard will appear && Click the 'Advanced Tab' && Under Browsing Section uncheck the 'Disable script debutting' checkbox && Click OK.
 2. Edit the java script code of the Entity Page that you want to debug.
 3. Put the statement 'debugger;' above the line where you want do the debugging. e.g. suppose my java-script show 'Hello World' message and i want to debug this then following is the way I am going to add script:
debugger;
alert('Hello World')
 4. Save and Publish corresponding customization.
 5. Perform the operation that would trigger the java script written by you
 6. Debugger dialog box will appear and select appropriate debugger (Visual Studio new or existing instance)
- And you may start debugging from the 'Debugger' statement of your javasript.

[How to add/remove columns in an entity lookup window](#)

Answer :: Go to Settings && Customization && Select the entity && Click 'Forms and Views in the Left Nav Pane' && Double click the 'Entity Lookup View' && Dialog box appears that contains the Add/Remove and Sorting options for a lookup view. [Read More](#)

[Now what will happen if 100 users will submit the request to the web-server? The plug-in code will get loaded into the memory for 100 times?](#)

Answer :: Answer is NO. Noticable point over here is that the Microsoft CRM is a mananged application and runs under .Net framework. So whenever the first request arrives at the web-server the plug-in code is loaded into the memory and will perform its operation and susequently the same plug-in code will serve the process for other user as well. So this way it saves the amount of time required to load the plug-in into the memory. If the plug-in code is not being used for long then the Garbage collector will identify it and will sweep the plug-in out from the memory. [Read More](#)

[Suppose there is a plug-in registered for account entity. When a user submits a request \(e.g. account creation etc.\) to the web-server then what will happen in the server?](#)

Answer :: The plug-in will get loaded into the memory and will perform the operation it is needed to do. [Read More](#)

[What is discovery Service?](#)

Answer :: The Discovery service is a global service that helps the caller to detemine the correct organization and URL. Microsoft CRM server may include several servers. Each server might be dedicated to multiple organization. Each of these servers will have dedicated web-service URL for faster operations. Internally the Microsoft CRM server allocation may change so the discovery service directs the request to its corresponding web-server for further processing.

In short the Discovery service responsibility is to find the 'CRM Service' and 'Metadata Service' urls.

The discovery service returns the list of organization URLs that the current-requester (current user) belongs to. During the Outlook client configuration discovery service shows the list of organization the current-user belongs to.

This web-service is used to create authentication ticket in case of Windows live authentication. [Read More](#)

[What is Metadata service of MSCRM?](#)

Answer :: Dictionary meaning of the word METADATA is data about data. [Read More](#)

[What is CRM Service of MSCRM?](#)

Answer :: CRM Service is the main web service and it exposes Six methods such that you can write your code against CRM entities. To perform operation other than the six operations (six methods provided by mscrm) we will have to use the Execute method. [Read More](#)

[Dreyfus BASIC SP 500 Index Fund](#)

[Dreyfus Instl Reserves Treasury Fund](#)

[GWK Multi-Cap Equity Fund\(A\)](#)

Answer :: It is absolutely impossible to answer this question. We don't know your investment horizon, or income level, or really anything.

So I'll do my best and give you generic advice. Stick with investing, no matter what the market is doing. Contribute the most you can contribute to obtain your company match (if there is one). You should shoot for about 15% of your income into retirement plans (including IRAs). And spread the money around, don't invest all of it in one fund.

Good luck. [Read More](#)

[I had to take a 10 year career break due to unforeseen circumstances.](#)

[I'm interested in getting into enterprise computing \(e.g. CRM, Project Management, Web technologies etc\).](#)

[Dreyfus Instl Reserves Money Hamilton](#)

[Dreyfus BASIC SP 500 Index Fund](#)

[Dreyfus Instl Reserves Treasury Fund](#)

[GWK Multi-Cap Equity Fund\(A\)](#)

Answer :: The Vanguard Total Stock Market Index is too broad IMO. It is a fund of indexes. It covers everything. BUT that means you own the dogs too. I prefer the SP 500 index because it is less broad but also

not managed and thus very low cost. The total is just too broad for me. But I have managed my investments more actively for a long time.

Now is a great to be putting money in to stocks with a 401(k) dollar cost averaging in for the long term.

But as far as the current market goes, I personally had split between the SP 500 index and a growth and a value fund.

You might want to do some research and reading on suggested asset allocations to get an idea of what you might want to do.

Good Luck. [Read More](#)

[I'm writing a research report about customer service at a call center and one of the requirements is to write about crm and I have no idea what it is or how to apply it to a call center.](#)

Answer :: I was in the business community for 50 years and never heard of this management. Customer relations has always been a function of the Sales Department who were responsible for the customer being satisfied with both the product and the service. [Read More](#)

[Is it better to get the CAM \(Certified Apartment Manager\) designation, offered by the National Apartment Association or is the CRM \(Certified Resident Manager\) designation better offered by the California Apartment Association?](#)

- [The CAM is about \\$700 and the CRM is about \\$1,500, but I'm not sure if that speaks to the quality of the programs, respectively.](#)

- [Thanks in advance... \(please no "Google it" replies, we all Google it first\)](#)

Answer :: The CAM would be better, since it is a national designation. I don't know anything about the CRM, but why limit yourself to the California one only?

You should also look into the ARM from the Institute of Real Estate Management (IREM). [Read More](#)

[Can someone help me for those questions?](#)

- [1\).Wireless media is also called whatmedia?](#)

- [2\).Microsoft's toilet project, the iLoo, was not a hoax and was confirmed by Microsoft to be a real project. True or False](#)

- [3\).Timely information must be up-to-the-second to be accurate. True or False](#)
