[What is the difference between WPF and Silverlight?](#)

Answer :: WPF(Windows Presentation Foundation) use for the Desktop Application and SilverLight is use for Web Applications (Rich Internet Applcaions).

Both Have their seperate XAML parser. [Read More](#)

[What is the difference between Silverlight 1 and Silverlight 2?](#)

Answer :: Nothing, Silverlight 2 is a full superset of Silverlight 1.0 - it is 100% compatible with Silverlight 1.0 applications and provides significantly more powerful features and functionality. Silverlight 1.0 applications even benefit from improvements in media playback and performance characteristics of Silverlight 2 with no additional work.

[How does XAP work in silverlight?](#)

Answer :: A basic xap file in silverlight will have an assembly related to specific code for the application, an application manifest file and any additional assemblies need to run the application. At a minimum, two files are needed, the application manifest file and the application assembly. For example:

```
AppManifest.xaml  
MyPianoV2.dll
```

Once you have created the .xap file, the Silverlight 2 or 3 plug-in downloads the file and runs it in a separate work space.

A .xap file is used to contain and transfer the assemblies and resources of a managed code application. This managed code application must be run within the Silverlight 2 browser plug-in. [Read More](#)

[How many ways you can display text using Silverlight?](#)

Answer :: Silverlight supports displaying static pre formatted text that is comprised out of glyph elements and

also dynamic text that uses TextBlock. With glyphs, one needs to position the characters individually while TextBlock supports simple layout. [Read More](#)

[What kind of audio video formats are supported in Silverlight?](#)

Answer :: Silverlight supports Windows Media Audio and Video (WMA, WMV7-9) and VC-1, as well as MP3 audio. [Read More](#)

[What is Silverlight?](#)

Answer :: Silverlight is a new cross-browser, cross-platform implementation of the .NET Framework for building and delivering the next generation of media experiences and Rich Interactive Applications(RIA) for the web. It runs in all popular browsers, including Microsoft Internet Explorer, Mozilla Firefox, Apple Safari, Opera. The plugin required to run Silverlight is very small in size hence gets installed very quickly.

It is combination of different technologies into a single development platform that allows you to select tools and the programming language you want to use. Silverlight integrates seamlessly with your existing Javascript and ASP.NET AJAX code to complement functionality which you have already created.

Silverlight aims to compete with Adobe Flash and the presentation components of Ajax. It also competes with Sun Microsystems' JavaFX, which was launched a few days after Silverlight.

Currently there are 2 major versions of Silverlight:

Silverlight 1.0 and Silverlight 2.0(previously referred to as version 1.1). [Read More](#)

[I have been in the industry for 3 years, .NET experience 3.5 ie\(WPF/Silverlight/Surface\(giant iphone\)/ASP.NET\). My dream job is to work wherever I want, get information on a task and just need to complete it with a group of people or solo. The trick is, salary! Yeah, so I will always be getting paid by a company and have something I can count on. Anyone know a company like this? Also I do understand contract work or freelancing is what this sounds like, but agian, I want to work for a company long term.](#)

-
[Thank you.](#)

Answer :: Have you thought about starting your own consulting firm? This seems like the best way for you to go. You are a lot like me in that I like to code. I am too well versed in the technologies you've mentioned and I was looking to get into the same thing. I quickly realized that, to start off, companies are not willing to allow 100% telecommuting at least in the beginning.

If you don't mind commuting for a few weeks or months first and then work out something with your employer, I don't see why you couldn't. They may let you do it for 2-3 days a week. If this doesn't work for you, you may want to freelance or start your own consulting firm. If you like coding for competition, check out TopCoders.com. You can win nice prize money if you really good.

Good Luck! [Read More](#)

[My boyfriend wants a remote control car to play around with and i want to get him one that is fun, not as slow as the ones you can get at Toys R US, but also not \\$400. Does anyone have any good ideas. I am not too savy on the specifications, but i found one from Silverlight that was originally 120 and not on sale for 40. Here is what it says:](#)

[This beautifully crafted and fully assembled Electric 1:16 Official Licensed Nissan Calsonic 350Z RC Car from Silverlit is one of the best showcase models for any car enthusiasts. This car has Digital Proportional Remote Control. The Digital Proportional function allows precise turning angels even in high speed! Fully equipped with 2 headlights, 4 brake lights and 4 signal lights!! When your making a left or right turn, the car will signal at the time of turning! The Calsonic 350Z RC Car comes fully loaded and Ready To Run \(RTR\). It includes a 6V rechargeable battery pack, AC adapter charger. Being from Silverlit, you can be assured that this is the highest quality product out there.](#)

[Features:](#)

[Full Function Digital Proportional Radio Control](#)
[1:16 Scale Licensed Vehicle](#)
[Ready-to-Run with 6V NiCd Rechargeable Battery](#)
[Independent Front and Rear Suspension](#)
[Digital Proportional Function](#)
[Steering Trim Alignment](#)
[Equipped with 2 Headlights, 4 Brake Lights and 4 Signal Lights](#)
[Professional Level Transmitter](#)
[Tri-Band Technology](#)
[Hobby Grade Details](#)
[Top Scale Speed Over 125 MPH](#)

[Includes:](#)

[Silverlit Electric 1:16 Official Licensed Nissan Calsonic 350Z RC Car](#)
[Full Function Digital Proportional Radio Control](#)
[6v 750 mAh NiCd Rechargeable Battery](#)
[AC Wall Charger](#)
[4 AA Alkaline Batteries](#)

[Specifications:](#)

[Height: 3 in.](#)
[Length: 10.5 in.](#)
[Width: 4.8 in.](#)

Answer :: Sounds like a good one. You always want to go with digital proportion controls(as you noted) If there are any hobby shops nearby consider making a trip to one of those... But make sure...whatever you buy.. is no Nitro powered. If you get nitro it requires nitro fuel and some technical skill to operate and use correctly. Silverlit is a good company, it is namebrand. I have bought one of there helicopters before, it was a cheap model. It ran

good, although it was two channel.

The 6v 750 mAh NiCd battery means it is fast trust me he will be impressed. [Read More](#)

[My computer is slow, becoming un-responsive, and weird things keep happening to my computer.](#)

-
[1. Whenever I look on another computer it used to show my computer on there, but show it twice, under 2 different "Workgroup's" MSHOME and WORKGROUP.](#)

[2. The computer is slow a lot of the time when doing things regularly.](#)

[3. Suddenly my mouse and keyboard become un-responsive, as does the whole computer, but it comes back. During this, all my usb devices seem to power down, the keyboard's lights stay on however, it is not usb, but still un-responsive, but all keyboard actions while this happens still happen after it becomes responsive again. Also, I couldn't shut down properly, as then it never became responsive again.](#)

[5. Activity light seemed to always be on.](#)

-
[More details are that #1 stopped after reboot.](#)

[The second thing still kept happening, the slowness stayed, but seems to have dissipated now, after the computer has been on a while.](#)

[The third thing hasn't happened again yet, but i haven't tried to power down once again either.](#)

[The fifth thing seems to have stopped for the most part.](#)

-
[6. This folder in my shared docs folder keeps coming back, named "microsoft" and sometimes comes back while my computer continues to run. and inside that folder is a "IdentityCRL" folder. Inside there is a "production" folder. inside there, there are no files or anything however. I even looked for hidden files and all, nothing.](#)

[so the full location is - C:\Documents and Settings\All Users\Documents\microsoft\IdentityCRL\pr... capitalization and all is accurate and correct, same goes for spelling.](#)

-
[Also, the list of programs I have downloaded, that are started right now, or have been started lately.](#)

-
<http://kociemba.org/cube.htm> rel="nofollow"><http://kociemba.org/cube.htm> Download link on left - not sure if its clean

[Windows Defender \(Microsoft Website\)](#)

[Windows Live Beta \(mail, messenger, photo gallery\)](#)

[Microsoft Visual Basic 2008 \(Microsoft Website\)](#)

[Updates \(Windows Update Website\) - besides the search update, search 4.0 i think.](#)

-
[Windows XP Home Edition SP3 - IE7](#)

-
[BYOND \(www.byond.com\)](http://www.byond.com) - should be clean - game site.

-
[surfing the web - IE7 - when fully updated - java, shockwave, flash, installed. not even silverlight.](#)

-
[also, i received a few files from people, which could have been possible viruses, but windows defender didn't alert me,](#)

and all the files work as expected, and also, i know the people i received files from, so i dought they would send me a virus.

Answer :: format hd :) [Read More](#)

Well...the other day i tried to download some microsoft software called "silverlight" [i didnt know what it did, but i was trying to download some entrance sample papers from the net and it said i needed that software]..the download was complete, but the next time i restarted my comp, this "you may be a victim of software counterfeiting" message popped up.

-
The thing is, i got my pc recently formatted, and the guy who did it for me used a pirated copy of windows. But i have the original one [which i forgot to give him]. I dont know how to get rid of that message without buying it, coz its a waste coz i already have the original thing!

-
Help!!!

Answer :: you should take it back and have a refund or fix the darn thing. [Read More](#)
